A results-driven Full-Stack Developer with 5+ years of experience specializing in the ReactJs and NodeJs. Proven expertise in building, optimizing, and maintaining dynamic user interfaces while adhering to front-end best practices and performance optimization. Proficient in consuming REST APIs within a microservices architecture and leveraging AWS cloud technologies. An effective communicator skilled in Git workflows and CI/CD, committed to delivering high-quality, secure, and impactful software solutions.

SKILLS

- **Languages:** JavaScript, TypeScript, PHP, Python, Java, HTML, CSS, MySQL
- **Frameworks & Libraries:** Node.js, React, Next.js, Vue.js, Express, jQuery, Sequelize, Material UI, Bootstrap
- **Cloud & DevOps:** AWS (Lambda, S3, EC2, Amplify, API Gateway, CloudFormation, CloudWatch), Serverless Architecture, CI/CD, Jenkins, Docker, Cloudflare
- **Tools & Platforms:** Git, Jira, Cloudflare (Workers, Zero Trust), Postman, WordPress

WORK EXPERIENCE

Senior Programmer Analyst | Osmosis Learn, Singapore (Remote) | Sep 2020 - Present

- Engineered and maintained complex front-end features using **Vue.js (Vue 2/3)**, ensuring high performance and adherence to modern best practices for a large-scale learning platform.
- Architected and implemented a scalable serverless backend on **AWS** using Lambda and API Gateway to support front-end applications through **REST APIs** and microservices.
- Spearheaded the end-to-end project lifecycle, from stakeholder collaboration and requirements gathering to final deployment, ensuring clear communication of technical concepts.
- Engineered and automated **CI/CD pipelines** using Jenkins and **Git workflows**, enabling rapid, reliable deployments and active participation in code reviews to maintain code quality.
- Enhanced application security by implementing best practices based on **OWASP** fundamentals and maintaining legacy systems built on PHP and Vue.js.

Web Developer (Intern) | 50Hands, Canada (Remote) | May 2020 - Sep 2020

- Developed and launched dynamic websites by translating stakeholder requirements into functional specifications using PHP, WordPress, and Tableau.
- Collaborated in an agile team environment to ensure website features aligned with client needs, contributing to timely project delivery.
- Conducted market and technology research to identify trends and best practices, providing insights that informed development strategies.
- Earned a letter of recommendation and a Canadian Experience Certificate for exceptional performance and contributions.

Founder & Web Developer | SOFAIO (OPC) Private Limited, Bikaner, RJ | Sep 2018 - Present

- Founded and managed a web solutions startup, successfully delivering over 20 websites for small businesses by overseeing the entire process from client acquisition to final delivery.
- Engineered custom web solutions tailored to unique client requirements, ensuring high levels of satisfaction and retention.
- Managed all business operations, including legal and accounting compliance, achieving a DPIIT Certificate of Recognition from the Government of India.

Product Developer (Part-Time) | Health Education Bureau, Jaipur, RJ | Oct 2016 - Jun 2019

- Engineered and launched innovative software modules, including a plagiarism detection tool and a marketing automation platform, adopted by over 300 colleges across India.
- Developed and maintained the organization's websites, performing security updates and troubleshooting technical issues to ensure 99.9% uptime.
- Collaborated directly with educational stakeholders to understand software needs and deliver tailored, high-impact solutions.

PROJECTS

- **AI-Powered Content Generation:** Developed an automated content pipeline leveraging the Gemini AI API to generate dynamic assets, including SEO-optimized meta tags and thumbnails, significantly accelerating content creation.
- **AI Community Digest Tool:** Engineered an intelligent summary tool using Cloudflare Workers AI to parse community discussions and generate audio summaries, enhancing content accessibility.
- **Self-Hosted AI Model Deployment:** Orchestrated the deployment of open-source AI models using Docker, Ollama, and Open WebUI to create a scalable and accessible internal AI platform.
- **Zero Trust Security Implementation:** Implemented a Zero Trust security framework using Cloudflare to fortify business applications, adding a critical layer of protection against modern threats.
- **Automated Platform Testing:** Authored robust automation scripts using Selenium to conduct comprehensive platform testing, improving software quality and reducing manual testing cycles.
- **AR Menu for Restaurants:** Architected a cutting-edge augmented reality menu application using React, Material UI, and Google's Model Viewer, allowing users to view food items in 3D.
- **Plagiarism Checking Software:** Designed and developed a plagiarism checker using complex algorithms and SQL queries in PHP. The tool is currently in use by over 100 colleges.
- **Educational Software Suite:** Developed a suite of 20+ virtual experimental software applications for Pharmacology and Physiology using Bootstrap and jQuery, adopted by over 300 colleges in India to enhance student learning.
- **End-to-End Website Development:** Delivered over 20 bespoke WordPress websites for a diverse client portfolio by managing the full project lifecycle from design and development to ongoing maintenance. See portfolio: [gb3335.github.io](https://github.com/gb3335)

EDUCATION

Master of Computer Application (MCA) | VIT University, Chennai, TN | Jul 2019 - May 2021 | CGPA:9.27 / 10

- Published two research papers in peer-reviewed journals and presented at an international conference.
- Mastered advanced concepts in Python, Java, Machine Learning, and IoT through over 10 academic projects.

Bachelor of Computer Application (BCA) | S.S. Jain Subodh College, Jaipur, RJ | Jul 2016 - May 2019

- Awarded a scholarship for academic excellence.
- Developed foundational skills in C++, Java, and Android development through hands-on projects and competitions.
